LIQVID ADVANTAGES

Availability

24/7

We understand that learners need immediate resolution of their problems. To ensure constant support for learners, our tutors are available 24/7 for all the subjects.

Qualification – Tutor capability

We believe that only an able teacher can bring out the true potential of a learner. All our tutors have a Master's or PhD in their respective disciplines and an average teaching experience of five years.

Customer Satisfaction

We place a lot of importance on the way students and tutors interact. Our tutors are rated as being highly learner-friendly and welcoming.

It comes as no surprise then that the team maintains an average Customer Satisfaction Rate of 91—the highest amongst all the competitors in the market.

eTUTORING

eTutoring or online tutoring is gradually becoming the chosen mode of tutoring for students of all age groups. We have a team of dedicated and experienced online tutors to cater to the learning requirements of these students.

We use the advanced *Whiteboard* software to create virtual boards similar to what is found in actual classrooms. Whiteboard provides all the tools required to teach any subject. Both the student and the tutor can simultaneously login and interact with each other in real time. As a result, the experience and the effectiveness of one-to-one *live tutoring* are replicated in a virtual environment.

HOMEWORK HELP

Home assignments are one of the basic methods for developing knowledge through research and analysis. A student is usually assigned homework to be done individually. However, with an overabundance of projects, it is difficult for students to find time for all their assignments and that's where we step in.

We offer round-the-clock assistance in homework assignments over a wide range of subjects. Our expert tutors can help students to understand and solve difficult problems.
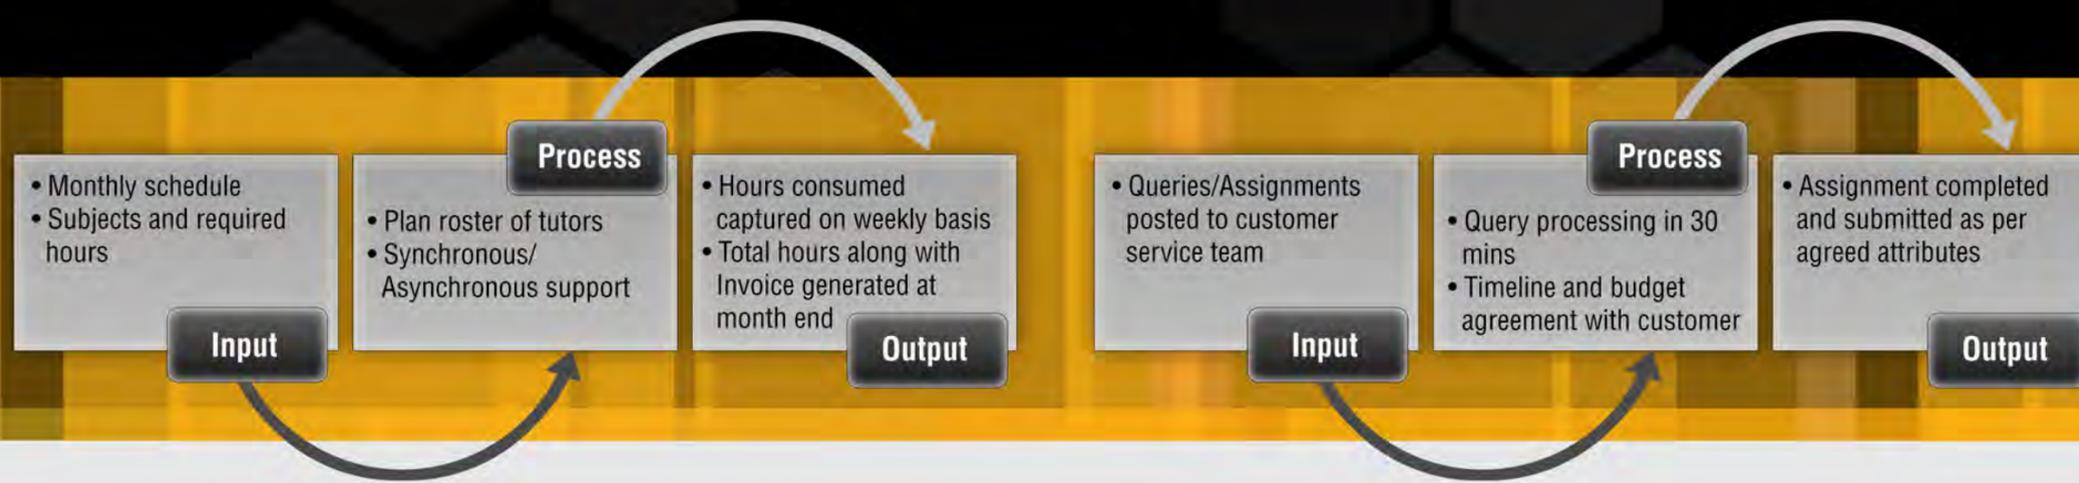

Our services focus on the highest quality of writing and exclusivity of each assignment. Tutors perform in-depth research on the topic before gathering, compiling, and providing useful information for the assignment. All the bibliographic sources are cited appropriately for students' reference and future use.

Each assignment is considered in isolation and assistance is customized as per the specific requirements of the learner. This ensures that the assignments are exclusive to a particular learner.

Parameter / Figures

Parameter	Figures
Total number of tutors allocated to a single US client	50 +
Total number of available tutors	1000 +
Total number of tutoring hours done annually	100,000 hours

eTutoring process

Input
- Monthly schedule
- Subjects and required hours

Process
- Plan roster of tutors
- Synchronous/ Asynchronous support

Output
- Hours consumed captured on weekly basis
- Total hours along with Invoice generated at month end

Homework Help process

Input
- Queries/Assignments posted to customer service team

Process
- Query processing in 30 mins
- Timeline and budget agreement with customer

Output
- Assignment completed and submitted as per agreed attributes
